DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "67" has been used to designate both the radial ribs and inclined panel in figure 2. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities:

On page 4, line 7 "." should be deleted.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 - 3 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification is rejected under 35 U.S.C. 112, first paragraph. In the specification (page 6), the reference to the range of 'A' being +/- 40% of 'D' is unclear. The dimension 'A' is given as 0.170 and the dimension of 'D' is given as 16 inches.

Application/Control Number: 09/828,673

Art Unit: 3745

Doing the necessary calculations, 40% of 16 inches is, 6.4 inches. Therefore, +40% of 16 inches is 22.4 inches, and -40% of 16 inches is 9.6 inches. It remains unclear as to how 'A' can be 0.170 inches when +/- 40 % of 'D' is in the range of 9.6 inches to 22.4 inches.

Claims 1 - 3 are rejected under 35 U.S.C. 112, first paragraph, as the specification is rejected above.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 1 line 6 states "a plurality of spaced radial rings connected to said concentric rings". It is unclear as to what is referred to as radial rings because there is no mention or description of radial rings in the specification. Radial rings are assumed to be the same as radial ribs.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Line 8 discloses, "said grill having a center plate to which some of said radial ribs are connected". There are two separate grills, a front grill and a rear grill. It is not distinct as to which grill is being referred to in line 8.

Application/Control Number: 09/828,673

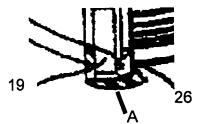

Art Unit: 3745

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1- 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Litvin 6,071,079. Litvin discloses a fan comprising: a fan motor housing 11 containing a motor and mounted to a rear grill 17; a front grill 25 having a plurality of concentric rings and spaced radial ribs 27 connected to said concentric rings; and a circumferential ring 26 having a curved panel (shown as reference 'A' below) extending to a rim 19 and an inclined panel 26 to which said ribs 27 extend. In column 2, line 45 Litvin discloses the front grill being made of molded plastic. Litvin discloses neither said circumferential dimensions being determined by the fan blade diameter, the dimension of the diameter from the tips of the fan blades to the inside diameter of said ring, the dimension of the depth of the ring, nor the dimension of the width of the ring.

At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to construct a fan with the necessary dimensions because Applicant has not disclosed that the claimed dimensions provides an advantage, is used for a particular purpose, or solves a stated

Art Unit: 3745

problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with different dimensions because the velocity of the fan can still be high. Therefore it would have been an obvious matter of design choice to modify Litvin to obtain the invention as specified in claims 1 and 2.

Prior Art

The patent to Litvin (6,309,192) and to Moreno (Des. 427,674) is cited to show a plurality of radial ribs, some of which do not extend to the center plate.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimya McCoy whose telephone number is (703) 305-0863. The examiner can normally be reached on Monday-Friday from 8:30 to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Look, can be reached on (703) 308-1044. The fax phone number for the group is (703) 872-9302.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0861.

PRIMARY EXAMINER

Attachment for PTO-948 (Rev. 03/01, or earlier) 6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the Notice of Allowability. Extensions of time may NOT be obtained under the provisions of 37 CFR 1 136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, MUST be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings MUST be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a)

Failure to take corrective action within the set period will result in ABANDONMENT of the application.
